

## ►► Fischbach high-efficiency-fans direct - compact – maintenance free

Fischbach high-performance blowers are characterized by a compact design with an internal motor and at the same time high volume flows of up to more than 40,000 m<sup>3</sup> / h, and can thus replace many commercially available fans with belt drive. Typical ventilation applications include Air Handling Units, Industrial, Extraction and Clean Room Technology.

Controllable via conventional systems or with the most advanced EC technology with various networking options for comprehensive and reliable monitoring of your ventilation systems.

Advantages:

- ErP conformity
- AC and EC Motor Version
- protection class IP65
