

FISCHBACH

Luft- und Ventilatorentechnik GmbH

▶ FISCHBACH PURIFIER... the silent one

99,995 % PURE AIR & WHISPER QUIET

The new Air Purifier from FISCHBACH for minimizing the risk of infection filters 99.995% of all aerosols from the air and, with its high air exchange rate, ensures safe air purification for closed rooms in schools, offices, waiting rooms, sport studios and many other areas of public life. It is operated via a standard 230 volt socket and can therefore be used anywhere at any time.

Filter sections

1. EPM 10 75% 2. EPM 1 55% 3. HEPA H14

In addition to the continuous regulation of the air volume and the LED operation switch, the integrated control unit also ensures that the filter inserts are replaced in good time by means of the integrated LED signal light. This guarantees year-round safe operation. The energy-saving EC motors from FISCHBACH also guarantee a long service life and a very low noise level.
